# jumbo air conditioners

...for the big areas

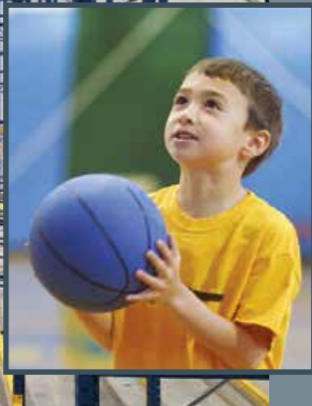

Australia's harsh summers and unpredictable winters have not long sent us indoors to meet our work, education, recreation, social and cultural needs. As a modern society we need considerable space.

Being physically comfortable is critical to how well we perform at work, respond to tasks, absorb information or simply relax and enjoy our favourite pastimes.

Efficiently controlling air-flow in large open spaces such as sports stadiums, factories, warehouses and department stores for the comfort of large numbers of people is no longer the difficult issue it was in the past.

The Smalldre Jumbo evaporative air conditioner comprehensively solves the problem, allowing sporting participants, workers, children, spectators and customers - large gatherings of any kind, to pursue activities in a controlled environment.

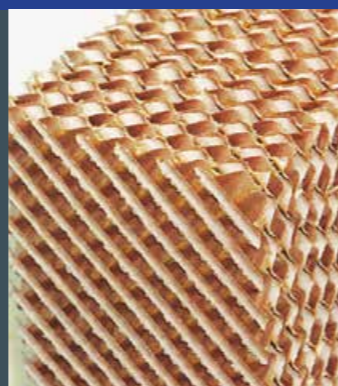

## cost effective and green Cooling systems

*"Jumbos are a mighty 60% more environmentally friendly and cost effective to run than roof-package units.*

*Choosing a Smalldre Jumbo requires no ducting and diffusers and halves the total project cost compared to roof mounted units."*

Smalldre's Jumbo units, with the potential of cooling a floor area of up to 400 square meters, work with nature to control the air-flow and atmosphere of large indoor areas. Because they work with simple elements of air and water, the units require relatively little energy to be highly efficient. This means they are an obvious environmental and economic choice.

Smalldre proudly manufacturing and promoting Australian-made products since 1974, has used environmental and economic principles as driving motivations for the Jumbo. In understanding customer needs, we also offer considerable back-up services and colour choices. The Jumbo has a 12 month warranty and comes in standard Natural Aluminium finish or the colourbond range of colours.

## new models with improved features

### Features and specifications:

- Cools approximately 400m<sup>2</sup> of floor area
- 12 Month Warranty
- Heavy duty marine grade aluminium cabinet
- Slim line tapered panels to compliment architecturally designed buildings
