axial fan

one of the most efficient

Gary Small, Managing Director of Smalldre, started developing the Smalldre Axial Fan in 1974. Gary is widely renowned for his fan design. The CSIRO rate his design to be one of the most efficient fans on the market, with a 79% total efficiency rating. This high efficiency means Smalldre air conditioners require lower wattage motors, using less electricity and creating less noise.

evaporative air conditioners

...how do they work?

Features:

- High quality, durable frame available in a range of colours
- Simple, reliable bleed off system
- 100mm thick filter pads
- Advanced wall control
- Highly efficient fan using less electricity and creating less noise
- 10 year frame warranty and 2 year component guarantee

Fresh air is cooled by being drawn through a water filtration system, breezing through your entire home by concealed ductwork to provide a comfortable temperature. This form of cooling is the most natural way for you and the environment. If you have allergies, this is the way to go! No stale air is recycled, fresh air is constantly exchanged by having windows open to flow air from your home. The water filtration system removes pollen, foreign bodies and dust to give you healthy, clean air.

Outlets

Our range of outlets includes multi-directional ceiling registers, two way wall registers and commercial plenums, for maximum design options.

Water Management System

The Smalldre bleed-off system is simple, no fuss and extremely reliable. It does not waste water by dumping it or need electronic components to operate. A unique feature of the bleed-off system is its ability to run the mist onto your garden, meaning no water is wasted!

Backdraft Shutter System

When the unit is not in operation the Smalldre backdraft shutter system remains closed to prevent heat loss in winter and drafts from dislodging closed vents.

Filter Pads

Smalldre use 100mm thick filter pads and both the width and height of these pads are larger than most of our competitors. This means that the water flowing through them has a larger area to cover, making the air entering your home much cooler.

External frame colours

The Smalldre frame is constructed from high quality Marine Grade Aluminium, powder coated for durability. We offer a choice of colours to coordinate with your home colour scheme using the full Colourbond range as standard.

Dropper & Ducting

All sheetmetal ducting is lined with 12mm insulation and our high quality flexible duct is insulated and fire rated to meet Australian Standards.

Economical to run

Our EB Series run from as little as 10 cents per hour. Low noise levels and a low profile ensure Smalldre air conditioners blend in with their environment.

Advanced wall control

our electronic timer and thermostat control guarantees a cooler, more comfortable climate in your home. Simply program the no fuss system to your needs and the thermostat will automatically turn the unit on and off as required. This control also operates with manual override. The best part about this control is you only have to set it once and forget about it for the whole summer!

specifications

evaporative air conditioner models & specifications

Model EB10

- Air output cubic meters/hour (CMH) 8500
- Air output litres/second (L/S) 2360
- Air output cubic feet/minute (CFM) 5000
- Watts 425
- Size: base length x width x height (mm) 990 x 990 x 670

Model EB25

- Air output cubic meters/hour (CMH) 14000
- Air output litres/second (L/S) 3800
- Air output cubic feet/minute (CFM) 8000
- Watts 550
- Size: base length x width x height (mm) 990 x 990 x 850

Model EB15

- Air output cubic meters/hour (CMH) 10200
- Air output litres/second (L/S) 2840
- Air output cubic feet/minute (CFM) 6000
- Watts 425
- Size: base length x width x height (mm) 990 x 990 x 670

Model EB30

- Air output cubic meters/hour (CMH) 17000
- Air output litres/second (L/S) 4700
- Air output cubic feet/minute (CFM) 10000
- Watts 750
- Size: base length x width x height (mm) 990 x 990 x 1090

Warranty

The Smalldre EB series has a limited 10 year frame and 2 year component guarantee. This illustrates how confident we are with our evaporative air conditioners. We pride ourselves in maintaining the quality that everybody deserves. Smalldre is an Australian owned and operated company and proud to be exporting overseas, achieving worldwide recognition.

Finance

Smalldre are now offering finance to approved customers. So having your airconditioning system updated is even easier!
