**Riser up**

**Riser down**

*RHS Picture:*

*Morris Airseeder bar in NSW owned by Mat Molloy.*

*Mat states he was struggling with 40 blockages per day, after fitting the Smallaire Telescopic Riser he is down to only a few blockages even in poor conditions.*

*\*Results may alter on different Airseeders*

**Smallaire Telescopic Riser**

**Features**

- Multiple fitting (Retro)
- Constructed from 304 Stainless Steel
- Super Gal RHS
- Minimum maintenance
- Easy Setup
- Capable of rising up to 1 meter high and lowering down to 600mm in total height.

The Patented Smallaire Telescopic Riser was developed and designed to be a multi fit application for a large range of airseeder machines which have a very compact fold design.

The Telescopic Risers 12 volt design can be extended at a flick of a switch all from the drivers seat. The main body constructed from premium quality 304 Stainless steel and with super gal construction its built to last.

When extended the Riser is at a height of 1 meter giving the system more gradient fall which could mean less blockages therefore less down time.
