

BUNKER TARPFEST

Smallaire Newsletter

November 2015

Tarpfast your Bunker this season

The Tarpfast blower works by creating a negative pressure under bunker tarps therefore sucking the tarp to the grain, this stops the tarp from flapping and tearing in windy conditions savings on grain spoilage, costly tarp repairs and down labour time.

Can you afford NOT to have a Smallaire Tarpfast on your bunkers this season?

Do the Math...

- **Torn Tarps** * **Down Time**
- **Spoilt Grain** * **Dangerous conditions**
- **Labour Costs** * **Peace of mind**

The ultimate choice

These Tarpfast units are the ultimate choice for being cost effective & specifically designed to suit this application.

"I would highly recommend the small air tarpfast. After having used these units for several years at Moore Bulk Storage Horsham, we have found that our tarps last longer and suffer no ripping or ballooning in windy conditions. I believe these units have prevented any tarp losses in server winds. The other benefits of these units are, compact design and low power consumption, with a 1/3 horse power motor capable of holding a 10,000 tonne bunker.

5,000 Tonn Bunker

In This Issue

- Benefits & Features
- Standard Kit Inclusions
- Cost comparison
- Research & Development
- A little taste of Smallaire

Features

- Strong galvanized construction
- Highly efficient
- Low running cost
- Light weight
- Choice of Electric, Petrol & Diesel
- Portable
- Full Kit packages
- Custom units available
- 12 Month Warranty
- Locally designed & Manufactured

The Standard Tarpfast Kit— What is included?

Blower unit -Choice of; .375Kw/2.2Kw Electric/
6Hp Yamaha Petrol/ 6.7Hp Kohlner Diesel

Blower Stand, 1.6mm galvanized construction

Suction plenum, 1mm galvanized construction

5 meters of 200mm Extractaflex Hose

200mm Duct end connector

200mm Lever Lock

Roll Duct Tape

Sales Consultant, Gerard Brookes with the Diesel model TarpFast

Full kits Priced from \$3,500 + GST*

** Price may vary, please confirm with Smalldaire prior to ordering*

Fact

10,000 Tonne bunker tarp cost \$38,500 (approx.)

Tarp lifespan is atleast 3 times more with a Tarpfast

Australian Made for Australian Conditions

Research & Development

We at Smalldaire perform extensive Research & Development on our products we manufacture.

As we are an Innovative company, with the continuous development of our current and new evolving products we are able to claim R & D Tax Incentives from the Australian Government, this enables us to fund our projects to deliver quality innovative solutions that our customers require,

Smalldaire invests in the Intellectual Property of the product by having their products Patented in Australia and overseas.
