BUNKER TARPFAST

Tarpfast your bunker

Keep Your Grain Covered & Your Tarps Secure.

Windy conditions can wreak havoc on bunker tarps — but the Smallaire TarpFast Kits helps keep them firmly in place.

By creating negative pressure underneath the tarp, TarpFast sucks the tarp down tightly against the grain, reducing flapping and movement that can lead to tearing and damage.

The result? Less grain spoilage, fewer costly tarp repairs and less downtime and labour spent fixing damaged covers.

Protect your grain. Protect your tarps. Save time and money with the Smallaire TarpFast.

Discover the NEW TarpFast Wind Venturi

In this issue, we're showcasing the NEW TarpFast Wind Venturi — an innovative, Australian-made solution that uses the power of the wind to hold bunker tarps securely in place. Designed for winds up to 150 km/h, it can dramatically extend tarp life, eliminate costly anchoring systems and requires virtually no maintenance or running costs.

We'll also cover the different TarpFast kits available, including Petrol/Diesel, Electric and Wind Venturi options, plus pricing and how the kit-form design can save thousands in freight.

Keep reading to see how TarpFast could save you time, money and damaged tarps!

We are proudly Australian Made

AUSTRALIAN MADE

Why the NEW TarpFast Wind Venturi is a Game Changer

NEW TarpFast Wind Venturi – Let the Wind Do the Work!

Patent Pending. Australian Made
The **NEW TarpFast Wind Venturi** harnesses the power of the wind to create negative pressure beneath your bunker tarp — no electricity, fuel or batteries required!

The stronger the wind blows, the greater the suction, helping hold your tarp firmly against the grain and reducing flapping, movement and wear. With zero running costs and virtually no maintenance, it's an efficient, environmentally friendly way to protect your grain and extend the life of your tarps.

What's Included
The complete TarpFast Wind Venturi Kit includes:

- 1 × Venturi Bunker Sucker
- 1 × Galvanised Steel Stand
- 1 × Suction Plenum
- 5m × 200mm Extractaflex
- 1 × Roll Duct Tape

From $9,092 + GST

No power. No fuel. No costly anchoring system. Just the power of the wind doing the work.

Standard TarpFast Kit – Choose Your Power

TarpFast Standard Kits

The TarpFast Standard Kit gives you everything you need to keep your bunker tarps firmly secured and reduce flapping, wear and costly damage.

Choose the blower to suit your operation:

- 0.375kW Electric
- 2.2kW Electric
- 6HP Yamaha Petrol

Each Complete Kit Includes:

- Blower unit of your choice
- 1.6mm galvanised steel blower stand
- 1mm galvanised suction plenum
- 5m of 200mm Extractaflex hose
- 200mm duct end connector
- 200mm lever lock
- Roll of duct tape

Complete Kits from $4,600 + GST

Reliable tarp protection, with a power option to suit your operation.

Innovation Starts Here at Smallaire

At Smallaire, we're always looking for the next big idea. With over 50 years of Australian manufacturing experience, our Research & Development team is constantly designing, testing and improving products that solve real problems.

From evaporative air conditioners, agricultural and air-seeder components, grain aeration systems and cooling solutions, through to solar-powered innovations, TarpFast and custom-engineered products, we're proud to turn ideas into practical solutions.

We don't just manufacture products — we develop solutions for the future. And there's plenty more exciting innovation on the way!
